

Midterm Presentation:

Risk Properties in Bandable Precision Matrix Estimation

Addison Hu
Statistics 490
01 March 2017

Outline

1. Refresher on Graphical Models & Multivariate Gaussian
2. Pairwise Inference for Entrywise Recovery of Σ^{-1}
3. Risk Bounds for Entrywise Recovery in $\|\cdot\|_\infty$
4. Next Steps

REFRESHER

Graphical Models

Markov Random Fields

Example: Hub and Spoke Model

$$\begin{bmatrix} 1 & 0 & 0 & 1 & 0 & 0 & 0 \\ 0 & 1 & 0 & 1 & 0 & 0 & 0 \\ 0 & 0 & 1 & 1 & 0 & 0 & 0 \\ 1 & 1 & 1 & 1 & 1 & 1 & 1 \\ 0 & 0 & 0 & 1 & 1 & 0 & 0 \\ 0 & 0 & 0 & 1 & 0 & 1 & 0 \\ 0 & 0 & 0 & 1 & 0 & 0 & 1 \end{bmatrix}$$

Multivariate Gaussian

PRECISION MATRIX ESTIMATION

Maximum Likelihood Estimation

Maximum Likelihood Estimation: Issues

Graphical Lasso

Asymptotic Normal Thresholding (ANT)

RISK BOUNDS IN $\|\cdot\|_\infty$

Risk Upper Bound

Theorem. *Lorem ipsum.*

Oracle Inequalities

Coupling Argument

Risk Lower Bound

Le Cam's Two-Point Argument

NEXT STEPS
